International Webinar on

Boost up Abstinence, Break up Substance use, Bring out Strategies

13.08.2020

10 am – 12 noon

The present scenario COVID-19 pandemic has brought major challenges to healthcare systems and public health policies globally in the Management (Treatment & Prevention) of Illnesses. Individuals with substance use disorders (SUD) are at risk population for contamination due to multiple factors including social and economic changes caused by the pandemic, along with the traditional difficulties regarding treatment access and adherence. We, as Health Care Professionals must be aware of specific strategies for prevention and treatment of SUD.
